NILS STEEL BOTTLE 12/24H 50 CL, SILVER CHROME

5018616

Nils is Sagaform's best-selling steel bottle. This chrome variant is made from recycled steel and is electroplated. Electroplating is a process that uses the principle of electrolysis to deposit a thin layer of other metals or alloys onto the surface of certain metals, enhancing their appearance. The steel bottle has unique properties. Its advanced vacuum design, featuring double steel walls and a copper coating, provides excellent insulation without condensation. The bottle keeps drinks ice-cold for up to 24 hours or hot for up to 12 hours. Capacity: 50 cl. Hand wash recommended. Packed in a stylish Sagaform box.
